Solar energy companies lebanon

Solar or Photovoltaic pumping (PVP) is the promising future of all water pumping projects worldwide...

Grid-tied (sometimes referred to as on-grid) PV systems are simply those that are connected/tied to an electricity grid.

With the increasingly dropping costs of energy storage and the rising trend and need to be completely energy independent...

PV-Diesel hybrid systems (sometimes referred to as rural electrification or mini-grids, although no clear-cut definition exists yet)...

Building-integrated photovoltaics refers to the use of PV cells as part of a building's architecture...

Energy efficiency (EE) is of utmost importance to serve the same original goal of renewable energy: cut-on Greenhouse-gas emissions and stop climate change...

Location:South Government, Lebanon

Mazraat KAR is an 84 kWp PVP project that is saving 48,000 in yearly diesel consumption, 129,600 kg in GHG emissions yearly, and \$33,600 in yearly diesel costs. As land is scarce and the landowner wishes to preserve all agricultural land, Mashriq energy devised a solution where a nearby internal road is used and function as both a passage for trucks and a mounting structure for PV modules.

Our portfolio includes a holistic bundle of energy saving solutions. We're known for our expertise in a wide range of systems including floor heating and solar panels in Lebanon & the Middle East. We do it smarter by analyzing all energy sectors at once. This unveils the savings hidden behind the wisdom and beauty of synergy.

We offer a bundle of premium class energy services. The aim is to complement our solutions and projects from start to completion. We strive to deliver our clients a turn key solution with a unique added value experience. Hence, combining our services to our solutions ensure a peace of mind along the project's lifetime.

Our journey has only started and more is yet to come. From solar panels to floor heating to led lighting to any other energy saving solution, our passion for the business will drive us daily to find new challenges and land on new territories.

Solar energy companies lebanon

IBC Solar has more than 40 years of experience and around 3000 MW of installed solar panels. With over 500 million euros of annual turnover, the company has conquered the tip-top charts of the solar industry. It has proven to be a leading solar supplier and a turnkey EPC system implementer all along the globe.
