Solar panel cleaning kit bunnings

Expandable wand from 1m - 1.8m. Flat spray nozzle useful for high pressure ...

The Bunnings Workshop community can help with your home improvement projects.

Hi everyone. I have an old solar hot water system on the roof and I've noticed it has got algae or something growing on it. Is there anything I should or shouldn't use to clean it? I've been putting it off as I'm not too keen to get up on the tiled roof as it could be slippery. I guess something that I could spray from a distance and stay on the relative safety of the ladder would be preferable. Thanks!
