Generating electricity with your own solar panels helps conserve the environment and save money. Take advantage of our solar power experience and request a quote for our solar power plant solutions.

Solar panels are suitable for the roofs of detached homes regardless of the type of roof. Our system components have been selected especially for Finnish conditions, with specific mounting systems for different roof types. Our solar panel packages are always tailored according to each customer's needs. You are eligible for a tax credit for household expenses for the installation of solar panels.

We deliver and install solar panels in most regions of Finland. At present, the excluded regions are Lapland and Åland. We make it easy for you to take advantage of solar panels, and we ensure that your solar panels start producing electricity as expected. We also monitor the production of the solar panels throughout their lifespan.

We ensure that the entire process of purchasing solar panels goes smoothly, from the initial inspection to installation and deployment. You will get everything you need from a single reliable supplier as a convenient turnkey delivery. Solar power systems do not require much maintenance, and we are always ready to help you with any questions you might have about your system.

The steps of the purchase

A reliable and high-quality choice for producing your own renewable electricity in an eco-friendly and efficient manner. Hehku solar power plants consist of conventional grey-black p-mono PERC solar panels.

A solar power plant that features advanced technology and consists of all-black n-type HJT solar panels. Hohde solar power plants provide an excellent power output guarantee, conversion efficiency and output, especially in high temperatures.
