Crossway Road, Port Area, PO Box 493, Betio K10108, Tarawa – Republic of Kiribati

Kiribati Green Energy Solution, a State-Owned Enterprise was established on 14 November 1984 under the Company Ordinance Cap 10A. It is a leading Government implementing agency in the energy sector deal with any renewable energy initiatives in Kiribati.

The Company aim to establish itself in leading Kiribati as the most trusted partner in providing green energy solutions as set out in its Mandates. In 2020, the reformation and renaming of the Company (commonly known then as Kiribati Solar Energy Company) was conducted with the core objective is to broaden its scope in providing services with renewable energy including solar energy, wave energy, wind energy and other RE technologies that is applicable in Kiribati.

The Kiribati Green Energy Solution headquarter office building is located in Betio, Tarawa Island. The Company currently have 3 branch office buildings located in London Kiritimati Island, Tebikeraia Maiana Island and Nuotaea Abaiang Island. The Company also have outlet retail store located in Bonriki International Airport, Tarawa. There is a development plan for the Company"s branch office buildings to be established and reached all outer islands with the ongoing rural electrification project.

PROMOTING OUTER ISLAND DEVELOPMENT THROUGH THE INTEGRATED ENERGY ROADMAP (POIDIER) PROJECT

Promoting Outer Islands Development Through the Integrated Energy Roadmap (POIDIER) project is a climate mitigation project funded by the Global Environment Facility (GEF) trust fund. The project is implemented by UNDP in partnership with the Government of Kiribati.

The main objective is to enhance the outer island development through the achievement of renewable energy (RE) and energy efficiency (EE) targets of Kiribati as stated in the Kiribati Integrated Energy Roadmap (KIER). The project was launched in January 2021 and is anticipated to complete in 2024.

The demo PV mini-grid systems will be installed on the outer islands/rural areas and it will be the first to have a revenue and billing system to facilitate financial sustainability. High-quality solar grid systems at globally competitive costs will be installed and distributed to the outer islands.

POIDIER also relates its mission to support the Kiribati Development Plan (KDP) - (2016-2019) to advance inclusive economic development in the following areas:

For further information and updates on the project activities and progress. Please visit POIDIER Facebook Page [here](#).

BUARIKI, KIRIBATI -- As late as 1990, nightfall in Kiribati (pronounced "Kiribass"), a patchwork of tiny islands in the middle of the Pacific Ocean, was accompanied by a peculiar odor. More than 60 per cent of the country's 103,000 people had no electricity, and whenever dusk fell, many of them would light greasy kerosene lamps in order to see.
