

Solar vs wind for home

Solar vs wind for home

Solar vs. wind energy: Which one is better?

Solar panels are the more practical option for homeowners, as wind turbines are too costly and require more maintenance. If you want to be off-grid or have a lot of land, combining solar and wind can make sense to...

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions. We have:

Sourced the majority of our data from hundreds of thousands of quotes through our own marketplace.

Incorporated third-party data and information from primary sources, government agencies, educational institutions, peer-reviewed research, or well-researched nonprofit organizations.

Built our own database and rating system for solar equipment, including solar panels, inverters, and batteries.

We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and suitability. To learn more, read about how we make money, our Dispute Resolution Service, and our Editorial Guidelines.

Installing a renewable energy system on your property is one of the best ways to save money on your electricity bills while reducing your impact on the environment. Often, your decision will be between solar energy and wind energy. If you're a homeowner weighing your renewable energy options, you already know that thorough research is the best way to find the right system for your home. Here's everything you need to know about the benefits of residential wind vs. solar so that you can make your decision with confidence.

In general, solar makes much more sense for residential electricity customers looking to save money.

Wind power is an effective tool for utilities looking to source more energy from reliable renewables.

Property owners can compare solar quotes on the EnergySage Marketplace to see how much you can save.

If you're interested in installing a renewable energy system on your property, solar is usually the best option. All things considered, solar isn't as popular as wind at the utility-scale but is generally a more practical renewable option for residential energy production. An experiment by Inland Power & Light, a utility in the Pacific Northwest, underscores the comparative benefits of residential solar. After fielding many inquiries about the benefits of solar vs. wind energy for homes, the utility actually installed both technologies at its

Solar vs wind for home

corporate headquarters in Spokane, Washington, to provide a definitive answer to its customers. Their result: Over the course of 14 months, the solar panels produced about five times as much electricity as the wind turbine.
