What we use! These are the panels we use: They are monocrystalline black on black ...

SolarWorld is a German company dedicated to the manufacture and marketing of photovoltaic products worldwide by integrating all components of the solar value chain, from feedstock (polysilicon) to module production, from trade with solar panels to the promotion and construction of turn-key solar power systems. The group controls the development of solar power technologies at all levels in-house.

SolarWorld AG is listed on the Frankfurt Stock Exchange, the Photovoltaik Global 30 Index and the DAX.

In May 2017, wholly owned subsidiary SolarWorld Americas, based in Oregon, US, joined fellow American solar panel manufacturer Suniva in its Section 201 trade action to request relief from what it claimed are unfair practices from solar panel importers to the United States. The requested remedy was a tariff on imported solar panels. FirstSolar, the largest US solar panel manufacturer, joined the action on October 10, 2017, while the Solar Energy Industry Association (the major American solar trade association) was leading the opposition to the tariff requests.

The newly founded SolarWorld Industries GmbH filed for insolvency again in March 2018. In June 2018 the regional public TV station MDR reported, that most of SolarWorlds production workers have been transferred into other forms of employment and production will be closed by end of September.

More than two years after the insolvency, the Solarworld factory in Freiberg gets a new opportunity. The buildings are sold for around twelve million euros to the new owner. The Swiss company Meyer Burger wants to produce solar cells in Freiberg and Bitterfeld-Wolfen. The production is expected to start in the first half of 2021.

SolarWorld was founded in 1988 as individual company by engineer and chief executive officer Frank Asbeck, and engaged in projects to produce renewable energy. In 1998, these activities were transferred to the newly founded SolarWorld AG, which went public on 11 August 1999.

In 2006 Shell divested its crystalline silicon solar business activities to SolarWorld.

SolarWorld has received German Sustainability Award in the category of "Germany's Most Sustainable Production 2008".

Since 2010 the company has a joint venture with Qatar Solar Technologies (QSTec). Due to a financial crisis, Solarworld was restructured and QSTec became the largest shareholder in 2013.

In 2012, Washington, D.C. based law firm, Wiley Rein, was hacked. According to Bloomberg News, the hackers wanted information about the German manufacturer SolarWorld. SolarWorld's computers were hacked about the same time.

On May 10, 2017, SolarWorld AG filed for insolvency citing "ongoing price distortions" and "no longer a positive forecast for the future". According to Mr. Piepenburg, the administrator, it is now of major importance to maintain business operations as smoothly as possible. In May 2016, a lawsuit brought by U.S. silicon supplier Hemlock was reported as "threatening the continued existence of the company" with damage claims up to \$770 million.
