Solis 15kw hybrid inverter

Solis 15kw hybrid inverter

S6-EH3P (8-15)K02-NV-YD-L series three-phase hybrid inverter is suitable for large ...

Solis, a pioneer in PV inverter technology, has introduced its latest solution for ...

S6-EH3P(8-15)K02-NV-YD-L series three-phase hybrid inverter is suitable for large residential PV energy storage systems with low battery voltage (48V). The products are compatible with high power PV panels, and suitable for a variety of brands" lithium and lead-acid batteries. In addition, the product has a wealth of features, including compatible generators, UPS level switching, grid-tied PV system coupling networking, supporting three-phase unbalanced load and half-wave load, etc. Helps households easily achieve zero carbon energy needs.

10 seconds of 200% overload capability

Multiple inverters can operate together to form a microgrid

Generator-compatible to extend backup duration during grid power outage

Supports dual backup ports for intelligent control of critical and non-critical loads

Supports Unbalanced and Half-Wave Loads on both the Grid and Backup Port

Supports a maximum input current of 20A, making it ideal for all high-power PV modules of any brand

Ensures excellent power supply stability, keeping the load unaffected by a weak grid or generator supply fluctuations

The battery's DC side can handle a maximum charge/discharge current of up to 290A, allowing it to store more surplus energy generated by PV systems

Intelligent redundant fan-cooling
