

Spain flywheel energy storage

Discover what Red Eléctrica is, what we do, and why we are the backbone of the electricity system in Spain and the ecological transition.

Red Eléctrica was created in 1985. Find out all the details of our journey and the most important milestones in our history.

We are the national electricity system operator

Discover the elements and special features that make up the national electricity system

Electricity Control Centres

We develop and maintain the electricity transmission grid to ensure a high-quality power supply for the entire community

We develop and maintain the grid infrastructures necessary to transport high-voltage electricity.

Technological innovation is key to the development of an increasingly efficient, flexible, intelligent and sustainable transmission grid.

We sustainably manage the transmission grid

Integration into the territory

We care about the best installation compatibility with the environment

We involve archaeologists in each of our transmission projects to prevent any damage to cultural heritage and preserve our historical legacy.
