St george solar energy storage

Czech independent power producer (IPP) Rezolv Energy has signed engineering, procurement and construction (EPC) contracts with three companies to build a 229MW solar PV project in Bulgaria.

Deals were signed with CMC Europe - a Hungary-based EPC contractor - and Bulgarian EPCs Solarpro and Green Solar Energy. CMC Europe and Solarpro will act as joint EPC contractors for the St. George project and Green Solar Energy will handle the high-voltage work connecting the site to Bulgaria's transmission grid.

The St. George PV project will be built on the brownfield site of the former Silistra airport, in the northeast of Bulgaria. Rezolv said that the 229MW site will comprise around 400,000 solar modules and is expected to come online in 2025. When it announced the site back in July 2023, Rezolv said it would be the "largest" PV project in Bulgaria upon completion.

Alastair Hammond, CEO of Rezolv Energy, said: "St. George will be one of the largest solar projects in Bulgaria, so it was necessary to find the right blend of local experience and international expertise. We also needed partners with outstanding track records who shared our commitment to sustainability. CMC Europe, Solarpro and Green Solar Energy meet all of those requirements."

Rezolv was launched in 2022 by sustainable infrastructure investment platform Actis to focus on renewable energy developments in Central and Eastern Europe.

Rezolv said that it currently has over 2GW of renewable energy projects under development or construction across southeastern Europe.

The region at large has attracted increasing attention for solar development. Perhaps the most notable development was the EUR2 billion April deal between Greek energy company Mytilineos and European utility PPC Group to develop 2GW of solar PV assets across Romania, Bulgaria, Croatia and Italy.

In response to your feedback, we have upgraded our product offerings and features to bring you the best experience.

Actis-backed Rezolv Energy has selected three companies - CMC Europe, Solarpro and Green Solar Energy - to build the 229 MW "St. George" solar park in Silistra Municipality in Northeastern Bulgaria.
