It might be the last truly bipartisan policy aim in Washington, and the least plausible one: Every U.S. president since Richard Nixon has pledged allegiance to the goal of "energy independence," even as the United States has remained dependent on imported oil. And as China's appetite for fossil fuels surpasses America's, energy anxiety has gone global -- just in time for another presidential election year.

1859 Edwin L. Drake drills the world's first oil well outside Titusville, Pennsylvania.

And as China's appetite for fossil fuels surpasses America's, energy anxiety has gone global; just in time for another presidential election year.

1859 Edwin L. Drake drills the world's first oil well outside Titusville, Pennsylvania.

1865 In The Coal Question, British economist William Stanley Jevons warns that Britain is in danger of running out of coal, threatening the country's strategic and economic preeminence; a matter, he writes, of "almost religious importance."

1912 Winston Churchill, then first lord of the admiralty, begins converting Britain's Royal Navy; the world's largest- from coal to oil, exchanging energy independence for power and speed. Over the next several years, Britain wrestles the oil fields of the Persian Gulf away from a crumbling Ottoman Empire.

1960 Oil exporters Iran, Iraq, Kuwait, Saudi Arabia, and Venezuela form the Organization of the Petroleum Exporting Countries (OPEC).

St john s energy independence

After taking power in a military coup, Muammar al-Qaddafi starts nationalizing Libya's oil fields; then the source of 30 percent of Europe's oil imports; thus beginning Western oil companies' expulsion from the Arab world.
