Stand alone solar kit 5kw

5kW solar kit Axitec 550 XXL bi-facial, Sol-Ark hybrid inverter. This high-power, low ...

SunWatts has a big selection of affordable 5 kW micro PV systems for sale. These 5 ...

5 kW SMA Solar Kits - 5 kW Solar Kits - SunWatts

5 kW Generac Solar Kits - 5 kW Solar Kits - SunWatts

5 kW SolarEdge Kits - 5 kW Solar Kits - SunWatts

Everything you need to grow your business with solar

Our 5 kW solar systems feature DIY solar kits which will produce at least 5kW (or 5,000 watts) of power. This translates to approximately 10 to 20 kilowatt-hours (kWh) per day, depending on your location and other factors.

Choose from a selection of 5kW solar kits with string inverters, microinverters and SolarEdge inverters, as well as ground mount options. We sell both grid-tie and off-grid solar kits. Consider hiring a local contractor or installing your own solar panel kit for additional savings!

Request a quote

Variables like weather, temperature, the age of your system and whether your panels are heavily soiled can affect how much power your solar system can produce.

Generally, a 5kW solar system generates about 5,000 watts of Direct Current (DC) power. However, if you account for system losses incurred by the above variables, you could potentially decrease the efficiency of your solar panels by roughly 5%.

The number of solar panels required to generate 5 kilowatts of energy hinges on the efficiency of your panels. Typically, you would need about 18 panels, but GoGreenSolar panels can do the job with 13 panels.
