

Sustainable energy week

The EUSEW 2025 Info Session took place on 14 November at 11.00 CET. Watch the recording to learn how you can shape EUSEW 2025 and explore this year's priorities and selection criteria!

EUSEW will take place from 10 to 12 June 2025 in a hybrid format, both in Brussels and online. It will include a high-level Policy Conference, the EUSEW Awards, the sixth European Youth Energy Day, and opportunities to connect with the EUSEW community at the Energy Fair. The call to host a policy session is now open.

The European Sustainable Energy Awards recognise outstanding individuals and projects for their innovation and efforts in energy efficiency and renewables. The call to apply for the Awards is now open.

The sixth European Youth Energy Day will take place during EUSEW 2025 and give young people aged 18-34 the opportunity to share their vision for Europe's energy future.

The Energy Fair is the perfect complement to the high-level Policy Conference. It provides the opportunity for participants and stakeholders to exchange ideas on policies and best practices, and is a chance to lay the foundations for future cooperation.

Sustainable Energy Days will take place around the world from March to June 2025, organised by public and private organisations. These events are the perfect opportunity to engage with local communities and other sustainability-focused changemakers throughout Europe and beyond.

The principles of sustainability serve as the cornerstone for the thematic focus of EUSEW and influence every facet of its planning and execution. Discover how this informs actions and decisions in critical areas.
