

Template citation wikipedia

The Citation template generates a citation for a book, periodical, contribution in a ...

Formats a citation to a website using the provided information such as URL and ...

Citation,????,?,(&lt;ref&gt;...&lt;&#47;ref&gt;tag),?1Lua,2?

,&#123;&#123;Cite book&#125;&#125;&#123;&#123;Cite web&#125;&#125;,;,,?

surname of the author of the cited material

given name (first name) of the author of the cited material

Title of source; displays in italics.

Full date of source being referenced in the same format as other publication dates in the citations.[1] Do not wikilink. Displays after the authors and enclosed in parentheses. If there is no author, then displays after publisher.

URL of an online location where the text of the publication can be found.

Wikipedia:#"citation"?

and put as much information as you can to the right of the equal signs. For example, suppose you wish to cite the statement

After your edit is published, the statement will have a reference footnote and the reference information will appear later in the page (usually in a References section), like so:
