Tesla solar roof nassau

The future of home energy is the new Tesla Ecosystem, now available to Long Islanders through SUNation Solar Systems. With over 3GW of solar installed in New York State alone as of July 2021, more homeowners are finding the benefits, and financial savings, of switching to solar power and sustainable energy products. With the arrival of the brand new Tesla 420W solar panels, SUNation can now offer homeowners the full Tesla Ecosystem, including the Tesla Powerwall charger and Tesla EV car charger, for a truly sustainable home.

Included in the Tesla Ecosystem is the Tesla Powerwall storage battery. As a Tesla Certified Installer, SUNation has helped Long Islanders keep their power on during cases of extreme weather by offering the Powerwall as a means of storing unused electricity. The battery energy storage system will automatically kick in during cases of power outages and can be monitored through a free, easy-to-download app. No noisy, dangerous generators needed to keep the lights on.

Rounding out this three-piece ecosystem is the Tesla EV Charger, which cuts out the stress of having to look for a charger before the battery runs out. Electric vehicles can get up to 44 miles per hour while charging, all from the comfort and convenience of home. With the electricity received through home solar panels like the Tesla 420W, it's the most sustainable way to power your vehicle.

Residents on Long Island can be the first to take advantage of the new Tesla 420W solar panels with the Tesla Ecosystem provided by SUNation Solar Systems. Voted the "Best of Long Island Solar Business" 12 years in a row, the team at SUNation is available to answer any questions or book a free consultation. Contact SUNation by calling 631-750-9454 or visiting [SUNation /book-a-consultation](#).

When it comes to selling your home with solar panels already installed, there are several opportunities that work to

As electricity costs continue to rise nation-wide, homeowners are seeking ways to future-proof their homes against increasing expenses. While

Veteran Appreciation month: \$1,000 discount for all who have served in the United States Armed Forces! Get \$1,000 off the cost of solar through 11/30. Click here to claim now. ?

The solar roof announced by Tesla and Elon Musk is a very exciting product. The EmPower Solar team has been a big fan of Tesla for many years. Since 2007 we've been driving Tesla's cars, and were front row at the 2009 Model S launch. Elon Musk is an incredibly inspiring figure for us and for many, helping to accelerate the shift to renewable energy.

While Tesla's primary expertise has been in the automotive industry, their parlay into renewable energy technologies is an exciting move. The new solar roof is a welcome solution to conventional panels as it overcomes a large barrier to consumer solar adoption; aesthetics. Although other solar roofing shingle combo products have not caught on in the past, we are hopeful that Tesla, a long-term partner of ours, will be successful in launching the new solar roof.
