Texas energy storage singapore

Singapore's First Utility-scale Energy Storage System. Through a partnership ...

A vital component of the world's energy infrastructure is our industry. Using our knowledge and experience as a foundation, we are qualified to lead the energy transition as the go-to partner.

Texas Storage Terminals Inc. is the operator of five bulk liquid storage terminals that are ideally situated in the USA, Singapore, United Arab Emirates and the Netherlands, two significant nations. The management team has extensive international experience in the energy and bulk storage sectors, and by expanding our range of solutions, we want to attract more clients and expand our business. In order to maximize utilization, we continuously upgrade, adjust, and optimize our assets. We want to be more present in Europe, but we won't take advantage of possibilities until they present themselves.

Our philosophy is centered on meeting the changing and present demands of our clients. As a result, in addition to tank container storage, we are focusing on providing state-of-the-art logistics services including chemical, renewable resource, and synthetic goods storage. By taking action right now, we demonstrate our recognition that the industry must advance and become more involved in the energy transition.

Texas Storage Terminals Inc. is the owner and operator of tank terminals for the handling of chemicals and products derived from oil in well-chosen locations near major rail, road, and shipping lanes.

The environment is impacted by our actions both directly and indirectly. Therefore, we wish to do everything in our power to portray ourselves to prospective clients as an eco-friendly company that reduces its negative impact on the environment. Given that our business depends on resources like water, power, and building materials, we are aware of the possible environmental risks related to our operations. Hence, in order to reduce any negative effects on the environment, both now and in the future, we must put in endless effort. To succeed, we've set high standards for ourselves in the surroundings.

Environmental issues are an essential part of our HSSE management system. Our HSSE policy requires us to use energy and raw materials efficiently, avoid harming the environment, and increase staff awareness of environmental issues in order to minimize negative effects. We have long kept track of the quantity and frequency of product releases, the energy and water used, and the waste produced at our sites. Furthermore, in order to more effectively identify and evaluate our progress, we have established relevant key performance indicators (KPIs).

Meeting the diverse needs of its clients in an effective and efficient manner is the company's goal. A large variety of petroleum and petrochemical materials can be stored in the facility. Break-bulk distribution, entire product blending, and storage in a separate oil tank supply farm are all made possible by its unique line

systems. An impermeable leak detection liner and a highly effective fire prevention system are put in the tank foundations to stop product loss and safeguard the environment.

Our industry has a diverse pool of talents, credentials, and expertise. We pick the most gifted individuals. Because of the constant changes in the markets, technology, and work environment, we must always be learning new things.

TEXAS STORAGE TERMINALS INC., tank storage facility located on Jurong Island in Singapore, is one of the largest independent petroleum storage terminals in Asia Pacific. The terminal offers 2.33 million cubic meters (m<sup>3</sup>) of storage capacity and modern berthing facilities, conceptualized from a trader's perspective with the aim of increasing flexibility and efficiency through providing one-stop services for storage, blending and distribution needs.

Texas Storage Terminals Inc. is the operator of five bulk liquid storage terminals that are ideally situated in the USA, Singapore, United Arab Emirates and the Netherlands, two significant nations. The management team has extensive international experience in the energy and bulk storage sectors, and by expanding our range of solutions, we want to attract more clients and expand our business. In order to maximize utilization, we continuously upgrade, adjust, and optimize our assets. We want to be more present in Europe, but we won't take advantage of possibilities until they present themselves.

Our approach is driven by the goal of satisfying our clients' evolving and current needs. Consequently, we are concentrating on offering cutting-edge logistical services including chemical, renewable resource, and synthetic goods storage in addition to tank container storage. By acting now, we acknowledge that the industry needs to develop and play a more active role in the energy transition.
