Top 10 charging solutions providers in the EV industry

Which Electric Cars Come With A Free Or Discounted Level 2 Home Charger? These Electric Cars Offer Plug & Charge In 2024 Home Charging Satisfaction Improves In The U.S.,

Our team has tested the top home EV chargers on the market. Check out our top picks for charging your electric vehicle with a Level 2 charger.

We tested the best home EV chargers for your electric vehicle based on amperage, durability, and smart features, to help you choose the right one.

The fastest EV on the track is nothing without the charging infrastructure powering it, which is where innovation meets impatience. In smart cities across the world, the demand for efficient and accessible charging solutions is high, as drivers want to make the switch to sustainable transport and not have to compromise their schedule.

The German charging provider Compleo Charging Solutions provides public, commercial and residential applications. The company also plays a role in educating EV drivers and businesses who want to install charge points for their employees. The Compleo Academy teaches drivers about EV charging, covering all the different forms of charging and the software that makes it tick.

Pronounced "new" Nxu (previously known as Atlis Motor Vehicles) manufactures battery cells and battery packs for EV drivers, for use across advanced energy storage systems and megawatt charging stations. Nxu aims to develop technology to make electrification viable for mobility and infrastructure.

"As we envision a future where charging infrastructure rivals that of traditional gas stations, where grid resilience is paramount and where infrastructure lines major highways, Nxu stands ready to meet those demands head-on," said Nxu Founder, Chairman, and CEO Mark Hanchett.

Blink Charging's EV charging solutions offer a variety of deployment configurations, offering high-speed performances on a smart network, including Level-2 and DC fast chargers. It has contracted, sold and deployed over 78,000 charging ports worldwide, many of which are networked EV charging stations, allowing EV drivers to charge with ease.

"It's gratifying to work closely with our nation's education system to provide charging solutions and, in many cases, an introduction to the EV driving experience for the next generation of Americans," said Jim Nemec, Chief Revenue Officer at Blink Charging.

Headquartered in Anji, Zhejiang Province, NaaS is among China's biggest EV charging service providers. NaaS also serves charger manufacturers, OEMs and other industry partners, helping to make charging faster, more convenient, with a superior customer experience - and in the process improving the operational efficiency for all parties within the industry value chain.

Anji is the birthplace of the motto: "Green waters and Green mountains are worth the same as Gold mountains and Silver mountains". Put simply, this means "a good environment is worth its weight in gold". At NaaS, that is proving to be true.
