Trina storage

Trina Storage delivers flexible and high-quality energy storage solutions to its ...

We offer flexible and cost-effective energy storage solutions for different application ...

The future of our energy infrastructure lies in smart storage solutions for diverse market applications seamlessly combining premium hardware, advanced software and reliable services.

With the fast development of technology, storage can strongly support the transition to renewable energy. We believe that energy storage is the missing piece of the energy transition puzzle. As the energy industry warms up to this technology, utilities, developers and power producers across the globe are faced with the critical challenge of finding the right energy storage partner. Trina Storage, bringing 26 years of solar experience comes with the vision to be the world-leading PV and smart energy solution provider. We aim to lead the energy transition through storage.

By offering an integrated cell-to-AC storage solution, we assist our customers in achieving their energy investment goals while minimizing the overall risk of their projects. Coupled with a solid foundation and infrastructure in North America, and leveraging 27 years of experience, we are well-equipped to locally design, install, service, and provide ongoing support for our customers today and throughout the lifespan of their grid-scale projects.

Renewable energy has become the most economical source of electricity in many regions worldwide. As renewable energy adoption accelerates, the demand for advanced storage solutions is rapidly increasing. Energy storage is essential for balancing power supply and demand, making it a cornerstone of future energy infrastructure. Smart storage solutions that integrate premium hardware, advanced software, and reliable services are crucial for various market applications.

With rapid technological advancements, energy storage is pivotal in supporting the transition to renewable energy. We view energy storage as the crucial missing piece in the energy transition puzzle. As the energy industry increasingly embraces this technology, utilities, developers, and power producers globally face the critical challenge of selecting the right energy storage partner. At Trina Storage, we aspire to be that partner, leveraging decades of experience to optimize every step of the process, minimizing risks and costs for our clients.

Our seasoned team of local experts is dedicated to supporting our clients every step of the way, tapping into an extensive network of local partners to ensure seamless solution delivery and successful implementation. This

Trina storage

approach, coupled with our fully integrated solution, distinguishes us from competitors offering fragmented solutions, establishing us as the single accountable partner for our clients.

With a fully wrapped, integrated cell-to-AC storage solution, Trina Storage is the only storage provider that manufactures its own cells with full visibility, transparency, and control over our supply chain, handling everything from battery cell R& D, engineering, and local manufacturing to delivery.

What does this mean to our customers? It translates to a reduction in risk and cost coupled with complete transparency and traceability from raw materials through manufacturing.

Enhanced Flexibility
