

Utility-scale solar cairo

Utility-scale solar cairo

We are thrilled to announce the successful financial close of the monumental Kom Ombo solar project in Egypt. Our commitment to renewable energy solutions has brought us to this momentous juncture.

Participation of Solar Shams in "Celebration of the national day of Switzerland" at the residence of the Swiss Ambassador in Cairo.

Construction & Projects Management.

Engineering Procurement and Construction EPC. is turn-key contract including design, supply and installation.

Solar Shams is an experienced projects developer with a local expertise to develop solar projects from concept to implementation.

Utility scale projects are usually ground-mounted and start from 5 MWp upwards. The utility scale projects off-taker is usually the Government, e.g

We are an Egyptian company which started operations in mid-2013. We are a renewable energy developer and Engineering, Procurement and Construction (EPC) projects & services provider in both Solar PV and Solar Thermal applications.

We are qualified by the Ministry of Electricity to develop utility-scale projects and have successfully concluded the co-development of 125 MWp Solar PV plants in Benban/Aswan. We are also licensed by the New and Renewable Energy Authority (NREA) to design, install and connect to the grid, solar PV plants.

ACWA Power's successful acquisition of financing support for our renewable project is a significant milestone. We're fully committed to fast-tracking the project's development while staying true to Egypt's renewable energy targets.

We are delighted to reach this important milestone and deepen our partnership with ACWA Power as we promote renewable energy in Egypt, and indeed in Africa. Expanding clean energy generation is central to low-carbon development on the continent and contributes to further reducing carbon emissions and achieving of the goals of Paris Agreement. This is in line with the AfDB's strategy to promote green growth in Africa.
