

Vatican city electric vehicle policy

Vatican city electric vehicle policy

The Vatican City State is strongly committed to the implementation of innovative and sustainable solutions that make it possible to reduce, in concrete terms, the impact of human activities on the environment in order to protect the planet. Mobility is at the heart of a specific program called "Ecological Conversion 2030", which aims to reduce the CO2 footprint of the state's vehicle fleet. To achieve this, the existing vehicles are to be gradually replaced by electric ones to make the entire fleet CO2-neutral by 2030.

Volkswagen is the chosen partner for this project, and through Volkswagen Financial Services it will supply the Vatican State with a fleet starting from the beginning of 2024. At later stages, further zero-emission vehicles also from the Volkswagen Group brands will be progressively handed over up until the entire fleet has been completely replaced by 2030.

"The electrification of fleets is becoming increasingly important across the globe. The fact that Vatican employees will now also be among our ID. drivers in the future is a great target and honor for our brand and underscores the attractiveness of our all-electric ID. models," said Imelda Labb? during the vehicle handover in Vatican City.

Dr. Christian Dahlheim added: "We are delighted to support the Vatican in this important project. This is something very special for us and shows that we are absolutely competitive with our mobility solutions."

The Volkswagen Newsroom is an open platform and offers comprehensive search options to all users.

The specified fuel consumption and emission data does not refer to a single vehicle and is not part of the offer but is only intended for comparison between different types of vehicles. Additional equipment and accessories (additional components, tyre formats, etc.) can alter relevant vehicle parameters such as weight, rolling resistance and aerodynamics, affecting the vehicle's fuel consumption, power consumption, CO2 emissions and driving performance values in addition to weather and traffic conditions and individual driving behavior.

Further information on official fuel consumption data and official specific CO2 emissions for new passenger cars can be found in the "Guide to fuel economy, CO2 emissions and power consumption for new passenger car models", which is available free of charge from all sales dealerships and from DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Str. 1, D-73760 Ostfildern, Germany and at

FILE - Pope Francis leaves at the end of the weekly general audience in St. Peter's Square, at the Vatican, Wednesday, Nov. 15, 2023. Pope Francis cancelled his trip to Dubai for the U.N. climate conference on doctors' orders. The announcement marked the second time the pope's frail health had forced the cancellation of a foreign trip: He had to postpone a planned trip to Congo and South Sudan in 2022 because of knee inflammation, though he was able to make the trip earlier this year.
