a small change, but one that is good for everyone to know: after the upgrade, Multis and Quattros in a DVCC enabled BMS systems now report their state as External-control- instead of Bulk or Absorption. There is no bulk -> absorption -> float charge algorithm when controlled by BMS, and there never has been. This cosmetic adjustment more accurately displays what is actually happening with the battery charge profile when controlled by a BMS. This change will reduce questions like "Why does my system never go to float ...is there something wron

Hi,I also realized today, that "ext. control" is mentioned.

After reading many posts in this forum, I think I found the answer:

Multiplus-II GX Online Manual

MultiPlus-II 230V Datasheet

firmware compatibility three phase system MultiGrid-II and MultiPlus-II
