

Vietnam solar panels

Vietnam solar panels

Boviet solar is a leading solar energy technology company founded in 2013 in Vietnam. We specialize in manufacturing advanced monocrystalline PERC and TOPCon solar cells, as well as Gamma Series(TM) monofacial and Vega Series(TM) bifacial solar modules for residential, commercial, industrial, and utility-scale solar applications.

Our mission is to make the Earth a better place for all living beings by harnessing and delivering the power of the sun. The adoption and expansion of solar energy play a crucial role in mitigating climate change, promoting environmental stewardship, meeting increasing energy demands, enhancing public health, fostering economic development, and improving global quality of life. This core foundational responsibility shapes our company culture, transcending typical business goals, fueled by our dedication to responsible corporate governance, social sustainability, and environmental stewardship.

Join us in utilizing the power of the sun to create a brighter and more sustainable world for generations to come.

Boviet Solar has been a trusted and reliable partner in the solar energy industry for over a decade. We remain steadfast in our mission to invest in our workforce, drive technological innovation, achieve manufacturing excellence, and deliver top-performing solar modules with exceptional support. Central to our operations is our commitment to supply chain transparency, adherence to international trade compliance, promotion of sustainability, and nurturing stakeholder relationships built on mutual respect and trust.

Explore our resolute reliability

Our renowned Gamma Series(TM) Monofacial and Vega Series(TM) Bifacial solar modules are synonymous with exceptional quality, reliability, and vitality. Engineered using advanced solar cell technology and intelligent design features, these modules are crafted from robust components under rigorous quality control and state-of-the-art manufacturing processes. This ensures superior performance and long-term durability across diverse environmental conditions. Partner with us to harness the power of solar energy with confidence and reliability.

We have adopted cutting-edge cell technologies, including Monocrystalline PERC and TOPCon solar cells, known for their exceptional power, performance, and efficiency. These advanced technologies ensure that our solar modules deliver superior results and long-term reliability for residential, commercial, industrial, and utility-scale solar projects. Partner with us to harness the power of solar energy with confidence and reliability.

CREATING A SUSTAINABLE FUTURE

Vietnam solar panels

Taking the initiative in building a clean energy future, powering sustainable communities in Globally.

AD GREEN is committed to providing innovative products and solutions that help make the world a healthier, safer and more sustainable place. We value our role in the global business community and honor our obligation to pursue the highest standards of environmental, social and corporate governance.

Lot A4, Nguyen Duc Canh industrial zone, Bui Vien, Tran Hung, Thai Binh province

Lot CN2, 37B Highway, An Ninh industrial zone, An Ninh commune, Tien Hai district, Thai Binh province, Vietnam
