Octopus Energy's dual fuel tariff packages are their most popular amongst customers. While they are listed as dual fuel options here they are also available as a single fuel tariff option should that be your preference.

Below you can find the cost information associated with these tariffs.

Prices displayed are national averages* Based on 2,900.00 kWh of ⚡ and 12,000.00 kWh of 🔥 per year on average* A Green tariff means the supplier injects in the grid the same amount of renewable energy that is consumed.

Octopus currently has one variable rate tariff.

What is Agile Octopus? It offers you half-hourly prices so that you can benefit from cheaper wholesale electricity prices. When wholesale electricity prices go down, so do your bills – and if your daily electricity consumption is shifted off-peak, you can save even more.

At Octopus you can also become a client if you have an Economy 7 meter. They have several plans for economy 7 customers.

These tariffs have two separate unit rates, one for peak hours of consumption and another for off-peak.

What are Octopus smart tariffs? Intelligent Octopus is a smart time tariff with peak and off-peak pricing.

What are octopus tariffs

Customers benefit from a low night tariff for their electric car and home electricity use of 7.5 p/kWh between 11:30pm and 5:30am. Outside these times, the uniform tariff varies depending on the region.
