Home EV Charger Installation

Our Home EV Charger Installation service makes it easy for you to get a Level 2 EV Charger or a 240-volt outlet installed. From getting a free quote to selecting a charger installation date that fits your schedule, our online portal guides you on your journey to home EV charging.

Receive a free charger installation quote customized to your home.

Installation of your Level 2 EV charger will be fully serviced by a local DTE-certified electrician. Licensed, insured and rigorously screened, DTE-certified electricians are expert in best practices, manufacturer guidelines and local building regulations.

Please note: This service is not regulated by the Michigan Public Service Commission and may be available from other providers. Your regulated rates and conditions of service provided by the utility are not affected by your participation in the program or by selecting another provider.

You are currently viewing Chevrolet (United States). Close this window to stay here or choose another country to see vehicles and services specific to your location.

Qmerit will assess your home, and then a licensed, insured and background-checked EV expert in your area will handle everything, from installation to pulling any permits required by your city or state.

Fill out our online installation form with a mobile device to easily add pictures of where you want charging installed.

Review the installation "Next Steps" you receive via email from Qmerit.

Confirm electrician has secured applicable permit(s) and schedule your installation.

Ask electrician to demonstrate your charger to confirm it works properly, then start charging.

Chevrolet has collaborated with Qmerit to provide home charging installers in your area to handle everything from installation to pulling any necessary permits required by your city or state.
