

Wind service

Wind service

Global Wind Service Academy. To further develop and strengthen technicians" ...

With operations spanning more than 35 countries, our dedicated team of over 3,000 wind turbine technicians combines profound technical expertise with insightful local knowledge. Our commitment lies in customizing services to meet the unique needs of each project, boosting efficiency, and ensuring utmost respect for project-specific requirements.

We offer comprehensive wind turbine services across Installation, Maintenance, and Specialty Services. Our experienced teams are dedicated to tackle any challenge, delivering the solutions you need, ensuring long-term success.

Excellence is measured not just by the services provided but also by the impact they leave behind. As your trusted partner, we commit to delivering top-tier installation and maintenance services that align with the highest standards of quality, safety and conscious practices.

Become part of a global company, where you will make a real impact, learn from the best, and build a fulfilling career. We offer challenging opportunities, a supportive environment, and a workplace where your contributions matter. Find out more about working and growing with us.

We specialize in both onshore and offshore wind turbine installations.

We specialize in major component exchange, repowering and decommissioning.

We specialize in the very complex high voltage and electrical fields.

Effective blade maintenance and repairs are essential for any of your wind energy projects.

We have a lot of experience diagnosing wind turbines, onshore and offshore.

Onshore or offshore, it is vital to protect components with ongoing inspections and maintenance repairs.

Combining expertise and experience to deliver specialized services with high complexity across disciplines.
